

Volume 7 number 2

\$0.00 U.S.

24 April 2004

Dear Neighbors,

I thought that I had better let you know the reasons that our lake has not been looking so good this month. Unfortunately, the company who services the lake, Aquatic Services (954) 977-7736, has not been able to apply the same maintenance procedures due to inaccessibility. Their normal monthly treatment included launching a small boat from the south end of the lake, driving their truck and trailer onto the property of the lakeside homeowners. Due to problems with their equipment causing damage to the property (i.e. deep ruts), the property owners have requested that they no longer continue driving over the property and hence, they are not able to launch the boat that carries the large amount of chemicals required to maintain control of the weeds and algae.

I have been in contact with the technicians, as well as the company management, in hopes of finding a solution that will be acceptable to everyone, but at this time have none. This week, a different technician applied additional treatment in hopes of containing the algae, using a large-wheeled powered wagon, he was only able to access a small area of the lake due to the fencing that blocked his vehicle.

One treatment option is for the technician to “backpack” the chemicals around the lake. Besides being less-effective, it also requires that the property owners grant access to the property. On the opposite side of this page, I have included a form to sign, and return, if you approve of allowing access to your property for treatment purposes.

Unfortunately, if a workable solution is not found soon, I will be forced to returned a portion of the money you graciously offered to keep the lake clean, and will cancel the contract leaving mother nature to take over. Seeing what happens after only a month of lack of treatment, I hope that it doesn't come to this. Kurt
